+ Work experience

OKX / Lead Product Designer

Jan 2025 - present

Core designer for OKX DEX growth - I delivered three zero-to-one initiatives, product roadmap workshop and 2 user research in my first six months, improving key user journeys across the Web3 experience.

Lead designer for OKX Boost - partnered with product leadership to design a scalable system for fast-moving on-chain events; post-launch, Boost became a major driver of DEX traffic, generating **$4B+ trading volume** and **$17.7M revenue**, now accounting for **~60% of total volume**.

Shipped AI Insights - summarized key token narratives from market data and X/Twitter to reduce friction to trade, increasing trading volume; later scaled as a reusable module adopted by other OKX Web3 squads.

Grab / Lead Product Designer

Aug 2021 - December 2024

Multi-ride types - Shipped multi-ride types, lifting fulfillment +0.4 pp and adding $1M+ annual revenue through planned experiments, rapid iterations, and qualitative user research.

WhatsApp chatbot - Shipped a WhatsApp booking chatbot that helped less tech-savvy users book rides, expanding reach to 74% of Indonesia's addressable market.

Monetization playbook - Designed a monetization framework and playbook adopted by 3 squads (Food, Ads, Insurance), creating synergy through clear rules and guardrails to grow stickiness—without disrupting the ride-hailing funnel.

Project Pitlane - Led a user-first initiative (Project Pitlane)—audited the end-to-end ride-hailing journey, documented 80 prioritized opportunities (deck + Jira), and shipped 10 improvements in 2 weeks; shared weekly updates with the CPO and Head of Design.

Recognition - Recognized for craft excellence; selected by the Head of Design as 1 of 6 designers (out of 120+) to help define future product design direction and roadmap.

+ Education

Nanyang Polytechnic / Diploma in Digital Media Design

specializing in Games design

+ Skills

Design

AI/MCP tools • Design Systems • UI Design • Interaction Design • Rapid Prototyping • Visual & Motion Design • Design Systems • Branding • User research • A/B testing • Data-driven design

Collaboration

Workshop Facilitation • Product Discovery & Strategy • Detail-Oriented Execution • Driving Cross-Functional Alignment

AI Innovation in Tech and Design

Staying up-to-date with design trends • Connecting design and code with AI (Cursor, Claude, V0) • Exploring new prototyping and animation tools (Rive, Framer, ProtoPie, Figma to Lottie)

2359 Media Consultancy / Founding UI/UX Designer

May 2011 - Jun 2021

Shaped design culture and raised craft quality by leading through execution - delivered work trusted by **DBS**, **SingHealth**, **Singtel**, **Standard Chartered**, **Fox** and **F1**, earning repeat client requests while mentoring juniors.

Built scalable design systems for returning top clients across finance, telecom, OTT, and healthcare, helping cement the company's leadership in the region.

SingHealth MyCare (during COVID-19) - designed patient + nurse apps to enable contactless requests and digitise ward workflows; grounded in SGH observations/interviews, saving up to 30% time, and rolled out across SingHealth hospitals.

+ Other experiences

TheMeatMenSG cooking channel / Co-founder, Social Media Strategist

Mar 2013 - Apr 2020

Scaled Facebook from 100,000 to 600,000 followers and Instagram to **60,000** with targeted content strategies.

Launched and optimized an e-commerce store using **data-driven insights**.

Produced multimedia campaigns that combined storytelling with audience targeting strategies
